

S7 Table. Summary of lead SNPs achieving genome-wide significance in established loci for BMI, WHR_{adjBMI}, FG and FI_{adjBMI}.

Locus	Chr	Position (b37)	Index SNP	Trait	Alleles (Effect/ Other)	Effect allele freq.	Meta-analysis			New lead SNP?	Present in HapMap?	Rationale for inclusion in this table	r^2 with previously reported lead SNP	New lead SNP p-value conditional on previous lead SNP
							Effect (SE)	p-value	N					
<i>NEGR1</i>	1	72,750,500	rs11209943	BMI	G/A	0.59	0.029 (0.005)	2.2E-08	86,996	Y	N	Top SNP from global meta-analysis	1	NA
	1	72,812,440	rs2815752	BMI	A/G	0.60	0.028 (0.005)	5.8E-08	87,002			Previously reported lead SNP from Speliotes et al (Nature Genetics 2010)	-	
<i>SEC16B</i>	1	177,889,025	rs539515	BMI	C/A	0.20	0.042 (0.006)	7.0E-11	86,962	Y	N	Top SNP from global meta-analysis	1	NA
	1	177,889,480	rs543874	BMI	G/A	0.20	0.041 (0.006)	1.1E-10	86,964			Previously reported lead SNP from Speliotes et al (Nature Genetics 2010)	-	
<i>TMEM18</i>	2	630,902	rs66553418	BMI	T/A	0.82	0.062 (0.007)	6.0E-20	86,380	Y	N	Top SNP from global meta-analysis	0.94	0.91
	2	622,827	rs2867125	BMI	C/T	0.83	0.060 (0.007)	2.2E-17	79,216			Previously reported lead SNP from Speliotes et al (Nature Genetics 2010)	-
