

Supplementary Data

SUPPLEMENTARY TABLE S1. AGE-ADJUSTED CORRELATION COEFFICIENTS AMONG SELF-REPORTED
REPRODUCTIVE TRACT INFECTIONS

<i>Reproductive tract infections^a</i>	<i>Spearman partial correlation coefficients</i>					
	N = 1653					
	<i>Chlamydia</i>	<i>Bacterial vaginosis</i>	<i>Trichomonas</i>	<i>Gonorrhea</i>	<i>Genital herpes</i>	<i>Genital warts</i>
Chlamydia	1					
Bacterial vaginosis	0.20	1				
Trichomonas	0.24	0.24	1			
Gonorrhea	0.31	0.13	0.23	1		
Genital herpes	0.08	0.12	0.08	0.09	1	
Genital warts	0.05	0.07	0.07	0.04	0.11	1

^aPelvic inflammatory disease is not included because it can be a mediator in associations between the above listed reproductive tract infections and fibroids, thus precluding its inclusion in a model with them.
