

Supplementary Figure 2 Shifts in SDAI disease activity category from Month 6 to Month 12.

Based on patients with data available at baseline, Month 6 and Month 12. SDAI disease activity states are mutually exclusive (a patient can be in only one category at any one time) and were defined as: remission = SDAI \leq 3.3; LDA = SDAI >3.3–11; MDA = SDAI >11–26; HDA = SDAI >26. HDA = high disease activity; LDA = low disease activity; MDA = moderate disease activity; MTX = methotrexate; SDAI = Simplified Disease Activity Index.
