

SUPPLEMENTARY FIGURES

Supplementary Figure 1: Box and whisker plot of the FKBPL scores from 140 full face sections provided by Nottingham compared with scores obtained from TMAs on two separate runs.

**Supplementary Figure 2: Comparison of automated and manual scoring methods of FKBPL staining intensity within 263 tumour cores (cohort I).** (A) Expression levels of FKBPL protein as detected by the automated system and (B) a box and whisker plot comparing the automated and manual scores for two scorers separately.
