

Supplemental figure S3

Outer membrane protein P5 expression by WT and Δ ompP5 mutants of strains Rd, R2866, 3655, 11P6H. The presence of OmpP5 in NTHi strains Rd, R2866, 3655, 11P6H WT and Δ ompP5 mutants was detected by Western analysis with rabbit polyclonal α -ompP5 serum. The molecular weight size marker is in kilodaltons (kDa). The two bands detected for Rd likely represents the unfolded and folded OmpP5 protein.
