

Table S1: Branch Score Distance (BSD) between the optimal AAF tree ($k = 21$) generated from assembled data of the 11 primate dataset (Fig. 2B) and trees generated with larger k .

Tree	BSD
$k = 23$	0.014
$k = 25$	0.014
$k = 27$	0.011
$k = 31$	0.007
