Supplementary Table 3 - Univariable Cox regression analysis in lymph node-negative untreated patients with *ESR1+/ERBB2-* tumors (total number = 223, unfavourable events = 33). The prognostic role of each miRNA was evaluated considering it as both continuous and dichotomous variable.

Variables	β	HR (CI95%)	P-value
miRNA as dichotomous variable			
hsa-miR-125b (+,-)	-0.454	0.635 (0.318-1.267)	0.198
hsa-miR-1308 (+,-)	NA	NA	NA
hsa-miR-548c-5p (+,-)	0.114	1.120 (0.551-2.277)	0.754
hsa-miR-30e* (+,-)	-1.880	0.153 (0.047-0.500)	0.0019
miRNA as continuous variable			
hsa-miR-125b	-0.141	0.868 (0.606-1.245)	0.443
hsa-miR-1308	NA	NA	NA
hsa-miR-548c-5p	0.430	1.537 (0.241-9.790)	0.649
hsa-miR-30e*	-0.767	0.464 (0.281-0.768)	0.0028
