

Supplementary Table 2: Single SNP association results for SNPs included in genetic risk scores. Association analyses were adjusted for age and sex. All associations are reported for the risk allele. Abbreviations: CAC, coronary artery calcification; CAD, coronary artery disease; CRP, C-reactive protein; eGFR, estimated glomerular filtration rate; MI, myocardial infarction; OR, odds ratio. For trait of interest analyses, beta values are shown for continuous traits and odds ratios are shown for dichotomous traits.

SNP	Risk Score	Alleles (M/m)	Risk Allele	Trait of interest in DHS	p-value	beta value/OR	Trait of interest		All-Cause Mortality		CVD Mortality		Self-reported History of MI		Self-reported History of CVD		Coronary Artery Calcification	
									p-value	OR	p-value	OR	p-value	OR	p-value	OR	p-value	beta value
