

# Overlap between differentially methylated CpGs and age sensitive DMRs (Autosomes only)

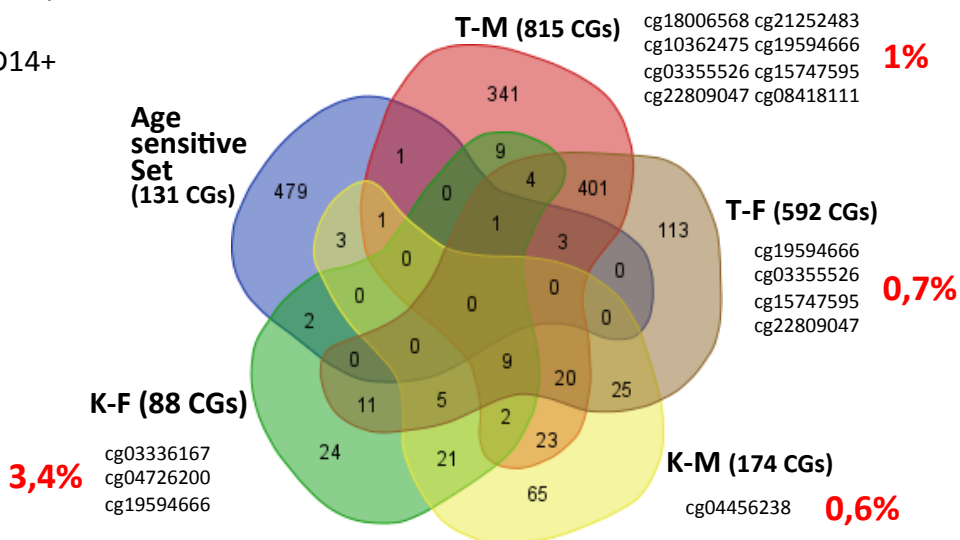

## Bell et al, Plos Genetics, 2012

Illumina 27K data: 490 CpGs  
Blood samples  
172 female twins  
32-80 years old

## Rakyan et al, Genome research, 2010

Illumina 27K data: 131 CpGs  
Blood samples and CD4+, CD14+  
93 females  
49-75 years old

## Weidner et al, Genome Biology, 2014

Illumina 27K data: 102 CpGs  
Blood samples  
0-73 years
