

**Additional file 7: Table S3. Chlorophyll fluorescence (Fv/Fm) measured on dark adapted leaves of Macia and Wray field-grown plants.**

<b>Cultivar</b>	<b>Fv/Fm</b>	<b>SE</b>	<b>p-value</b>
Macia	0.794	0.002	0.753
Wray	0.795	0.003	

Measurements were taken 56 days after planting on N = 5. No statistical differences were detected between the two cultivars.
