

A.

Afu6g11470

B.

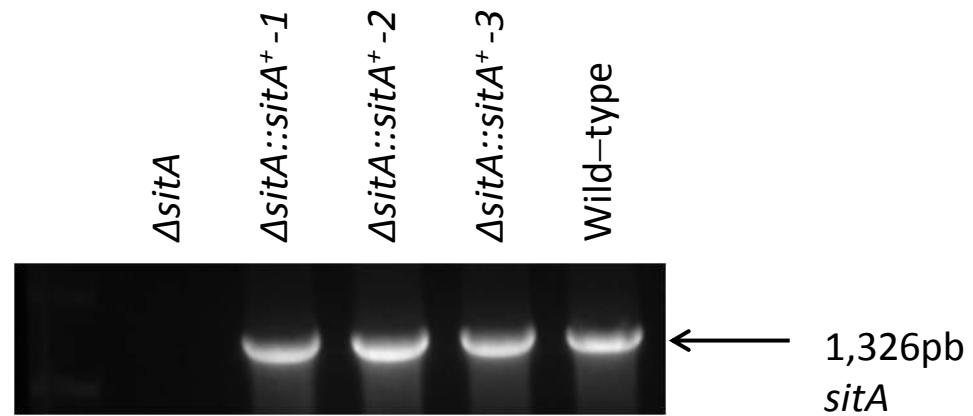

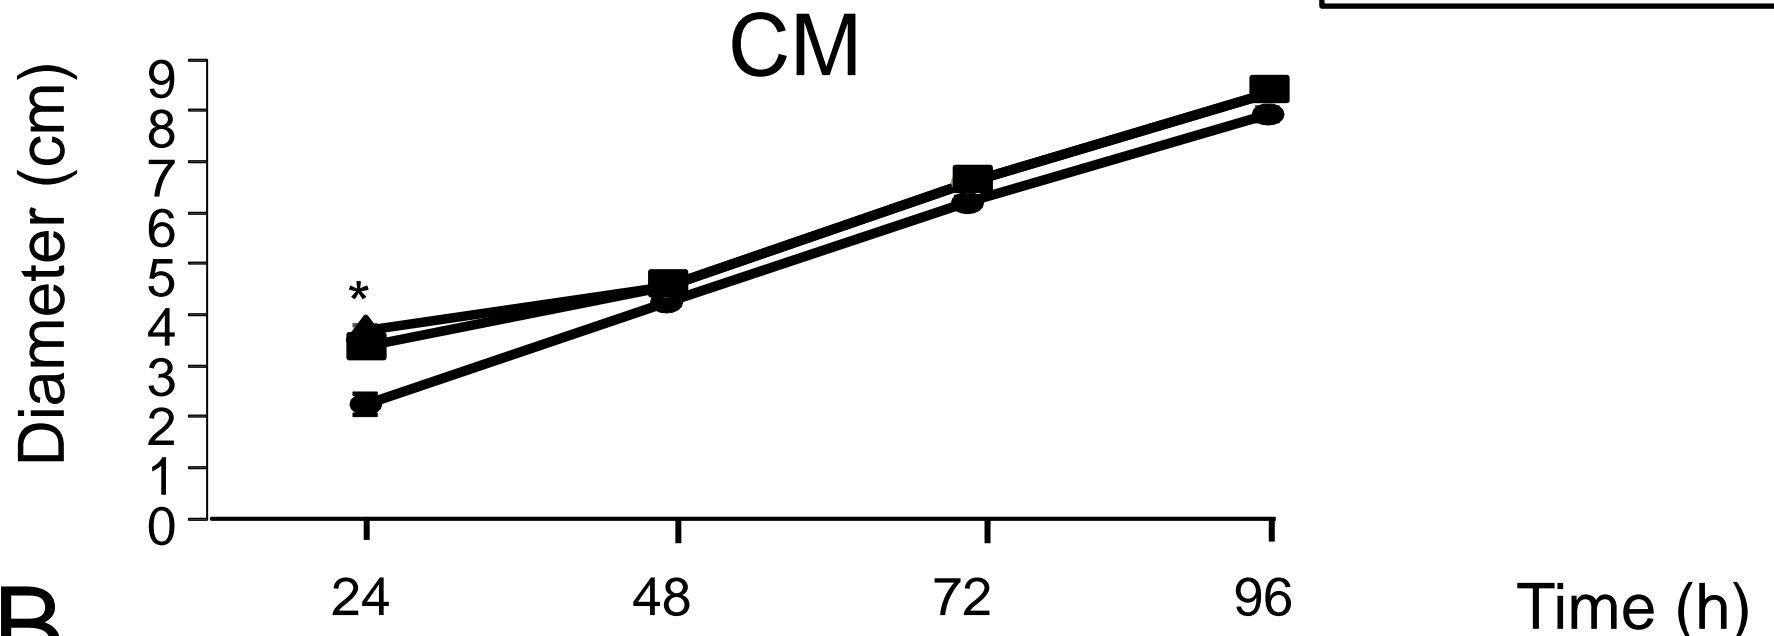

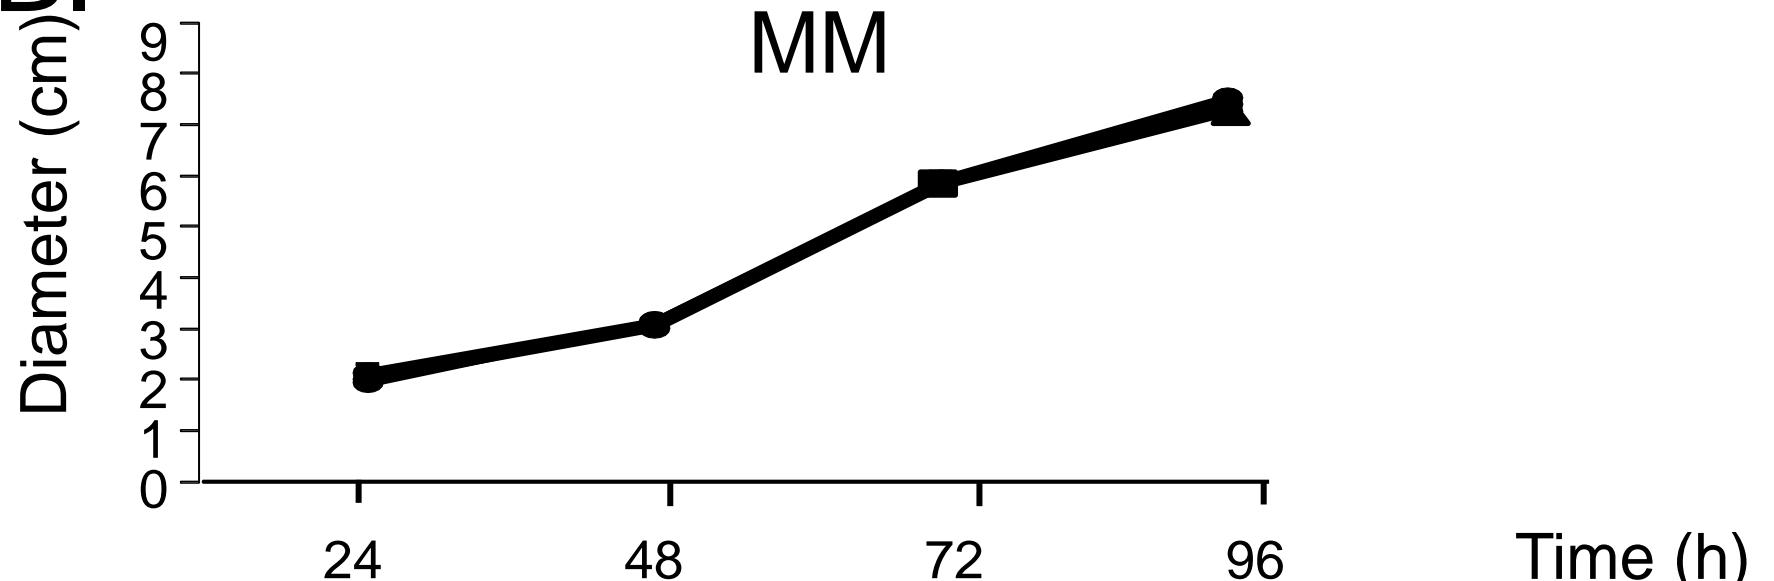

Figure S1 – (A) Southern blot analysis for Afu6g11470 (*sitA*) null mutant mutant.
(B) PCR analysis showing the complementing strain.

A.

CM

B.

MM

Figure S2 – Growth curves (radial diameter) for *A. fumigatus* wild-type, $\Delta sitA$, and $\Delta sitA::sitA^+$ grown in complete medium, CM (A) and minimal medium, MM (B) for 24 to 96 hours at 37 °C (*, p -value <0.01 when compared to the wild-type strain).

.

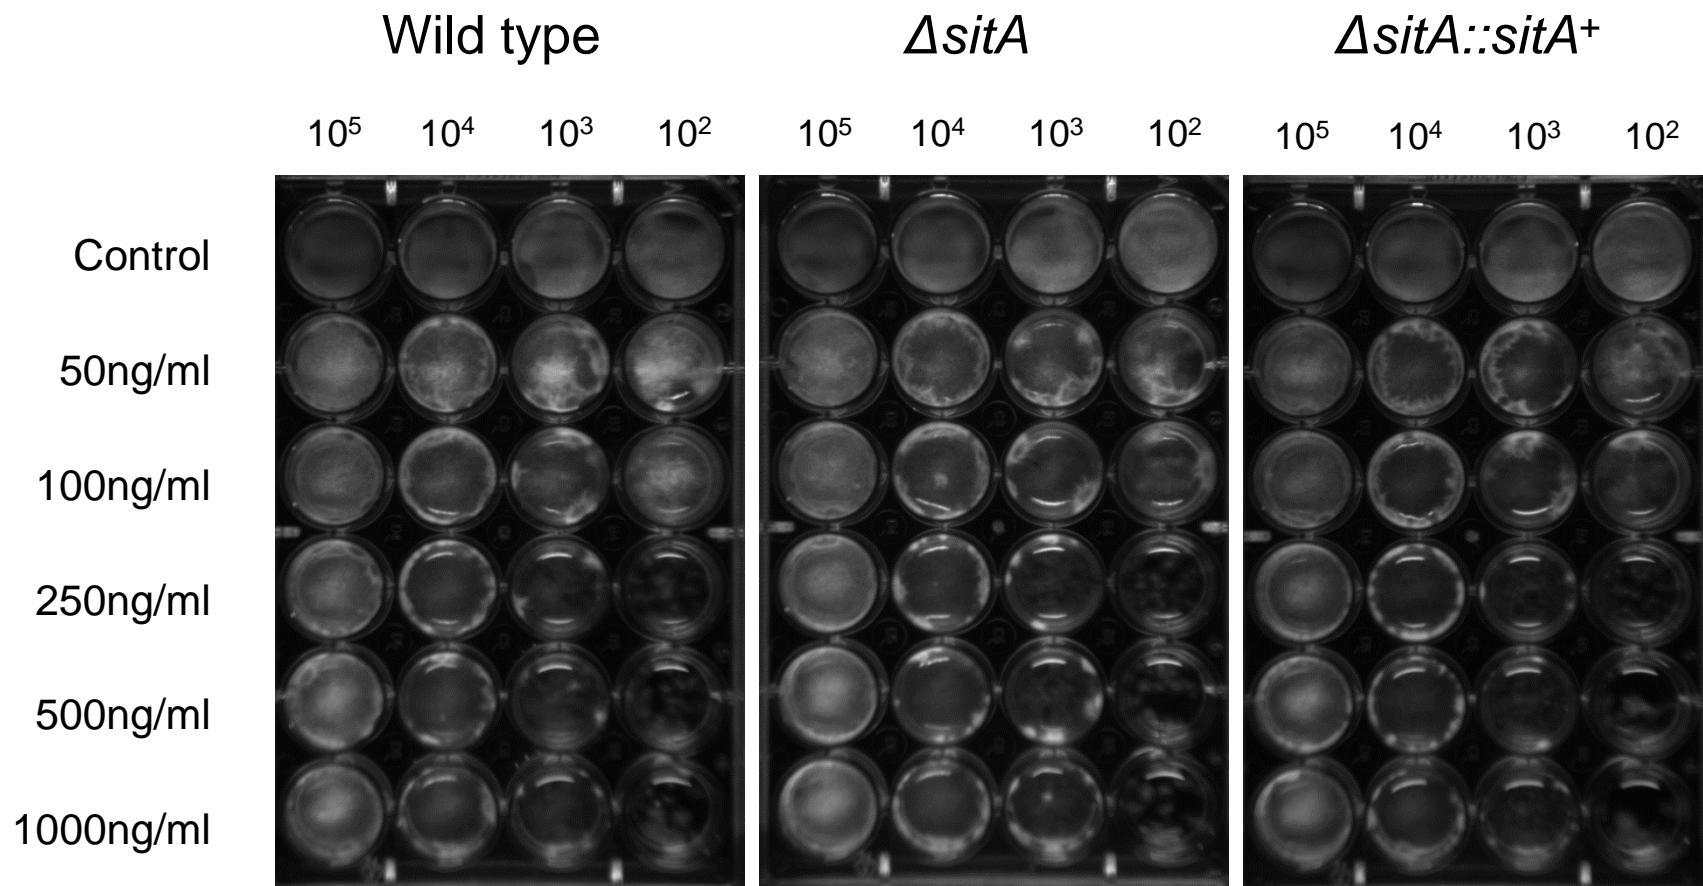

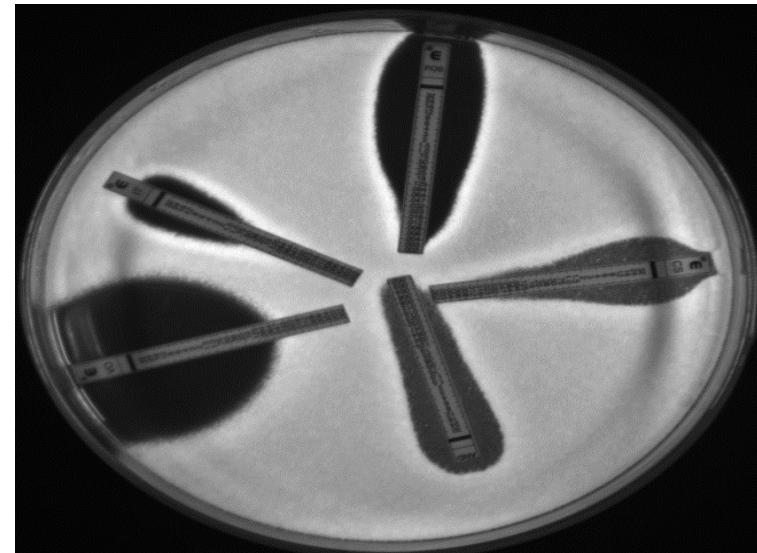

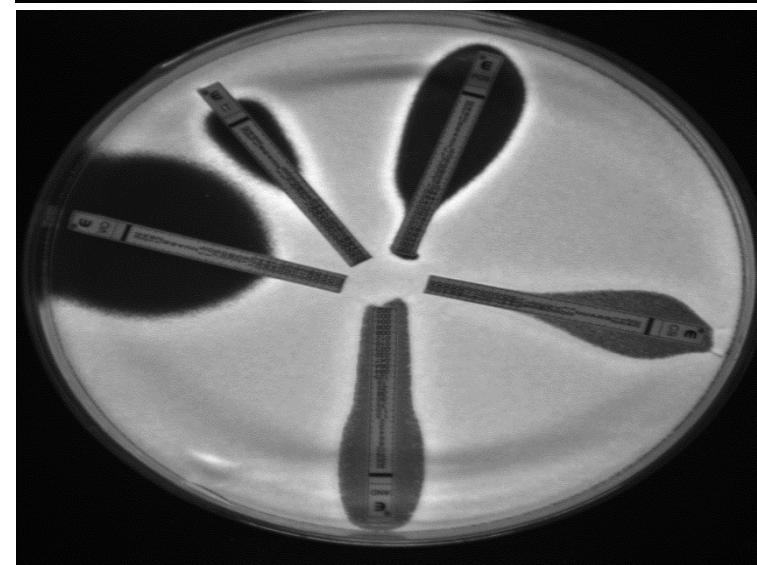

Figure S3 – Conidia dropout growth experiments with rapamycin.

A.

Wild-type

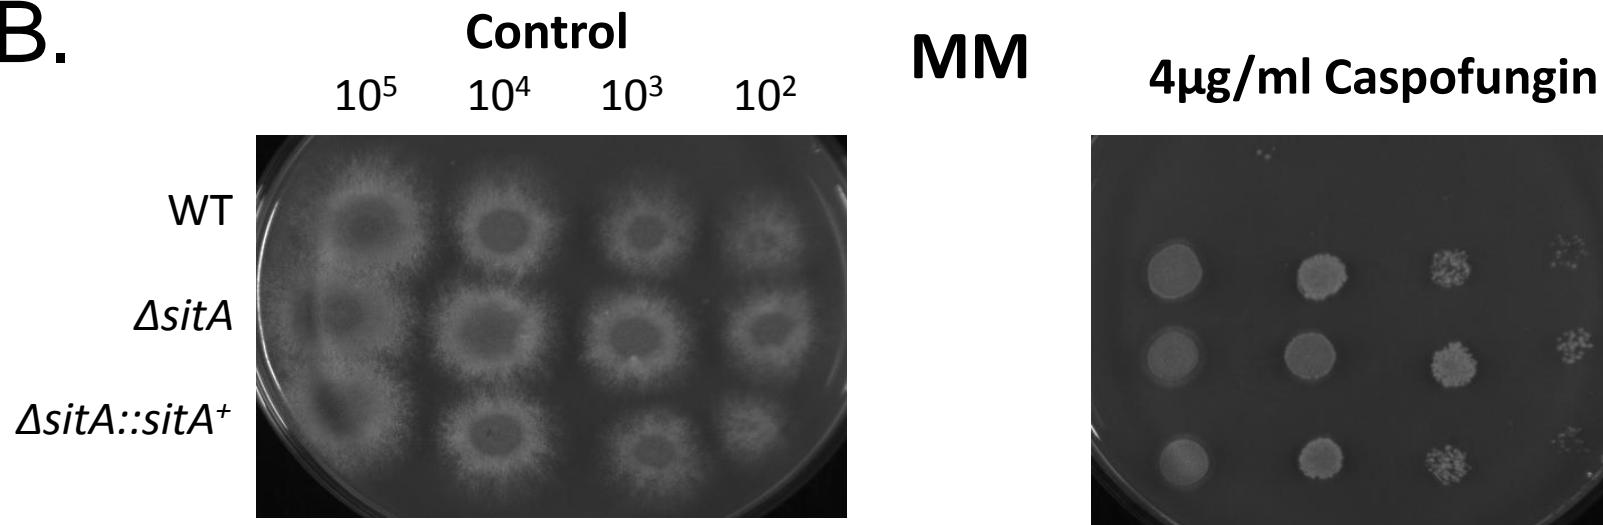

$\Delta sitA$

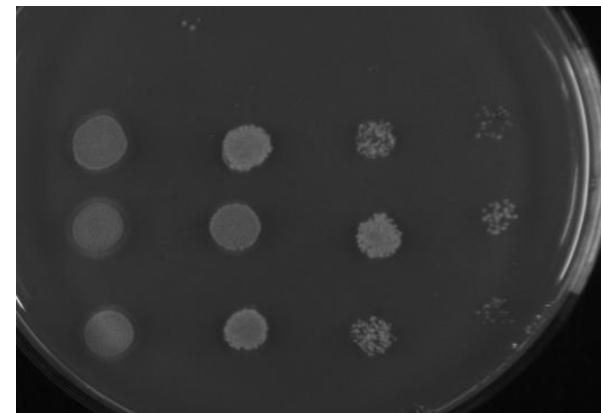

MIC ($\mu\text{g/ml}$)	Voriconazole	Itraconazole	Posaconazole	Caspofungin	Anidulafungin
Wild type	0.064	0.75	0.016	0.023	ND
$\Delta sitA$	0.064	0.75	0.016	0.19	ND

B.

MM

4 μ g/ml Caspofungin

5 μ g/ml Caspofungin

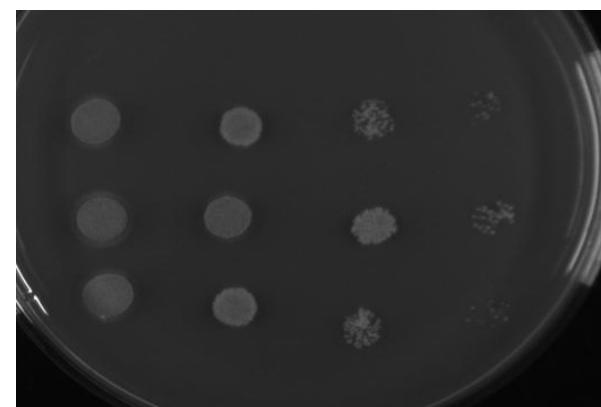

Figure S4 – (A) Etests for the *Aspergillus fumigatus* wild-type and $\Delta sitA$. (B) Drop-out experiments for caspofungin.
