

## Supplementary Information

**Figure S1.** 2% agarose gel electrophoresis of *cox1* amplicons of *S. haematobium* (*S. h.*) and *S. mansoni* (*S. m.*) from urine and stool samples, showing the specific PCR profiles (A: new primers; B: pretested primers). Ladd 100 = 100 bp ladder, +ve C = positive control and -ve C = negative control.
