

**Supplementary Table S2: New taxonomic assignment of sequences of basal fungal lineages.** Fungal sequences were subjected to BLAST-N analysis and checked for their taxonomic placement in the eukaryotic guide-tree of the SILVA release 111. Sequences were classified depending on combined results from the methods mentioned above as well as literature searches.

Accession number	Name	New classification based on combined results	Clustering of the sequence in the eukaryotic guide tree of SILVA	Best BLAST-N hit Name	Accession number	E.value	Identity
AB191431	Uncultured fungus	<i>Chytridiomycota</i>	<i>Chytridiomycota</i>	<i>Basidiobolus haptosporus</i>	AF113413.1	0.0	91
