

Supplementary Appendix 1. Diagnostic codes used to define study measures.

Table S1. Diagnostic codes used to define outcome measurements.	
Outcome measurement	Diagnostic code^a
Gout	274
Acute kidney failure	584
Chronic kidney disease	585
Renal failure, unspecified	586
Nephrolithiasis	592
Other renal disorders	593

^a Diagnostic code based on the International Classification of Disease, Ninth Revision, Clinical Modification (ICD-9-CM).

Supplementary Appendix 2. Study design for data integration and ascertainment of the primary outcome of time to first diagnostic billing claim for gout or pharmacy fill record for a medication typically used to treat gout among living kidney donors and age- and sex-matched non-donors.

Supplementary Appendix 3. Renal diagnosis rates among living kidney donors with gout compared to non-donors with gout, matched 1:3 by age and sex. $P > 0.05$ for all comparisons.
