

PRX4 as a lung cancer prognostic marker

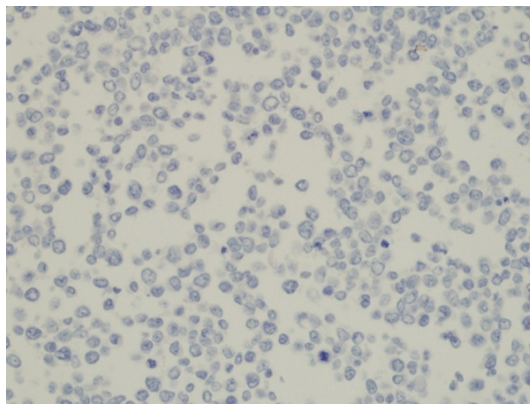

Figure S1. Photomicrograph of normal human bronchial epithelial cells (BEAS-2B).

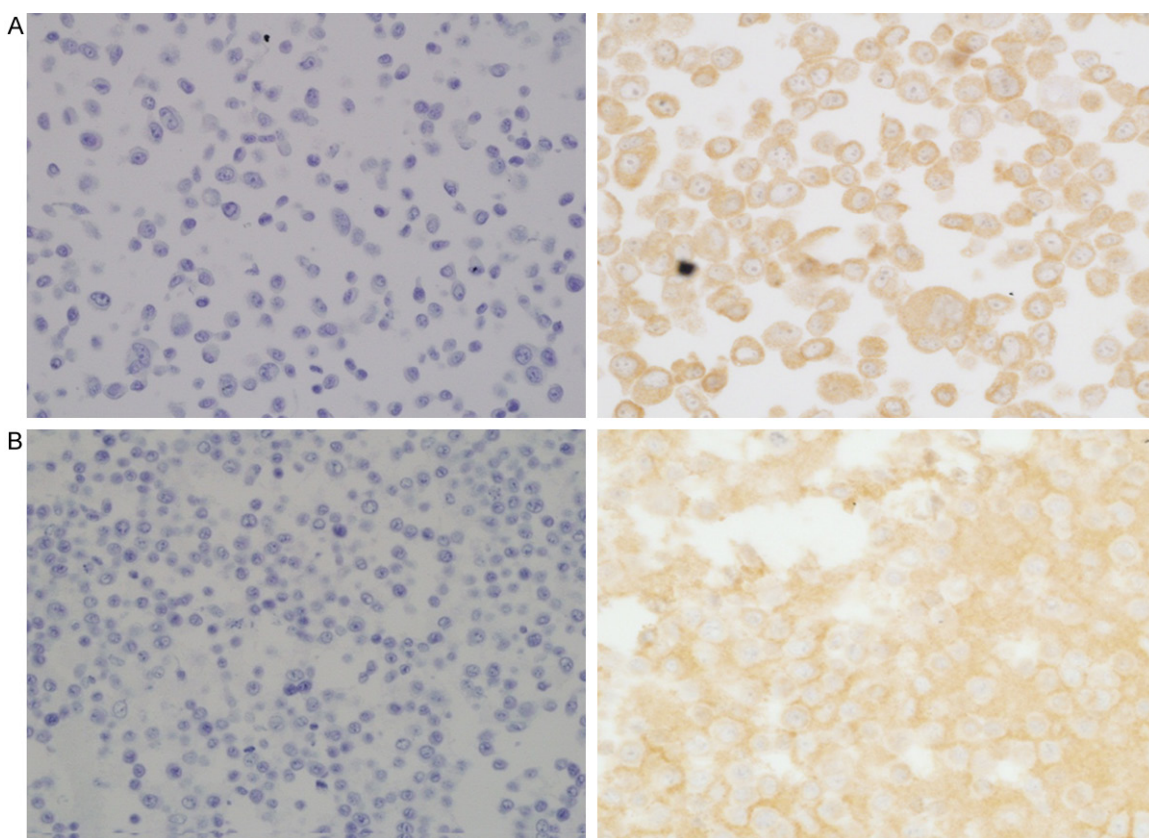

Figure S2. Photomicrographs of negative and positive controls (left column: negative control, right column: positive control), representing (A) H1793 cells and (B) A549 cells, respectively. (Original magnification-left column: $\times 200$, right column: $\times 400$).
