

Supplementary Fig. 1: *fahd-1(tm5005)* *C. elegans* have a slightly reduced body size

4-day old gravid *fahd-1(tm5005)* and wild-type hermaphrodites were imaged (representative images shown in left panel) and their body size was determined (quantification shown on right panel). *fahd-1(tm5005)* *C. elegans* are slightly but significantly shorter compared to wild-type controls of the same age ($1,395.14 \pm \text{SD } 164.41 \mu\text{m}$ for wt vs. $1,277.56 \pm \text{SD } 167.67 \mu\text{m}$ for *fahd-1(tm5005)*; $p = 0.0031$; $N = 20$). Scale bar: $100 \mu\text{m}$
