

Dataset S3: This table provided the ability to determine whether two genomes with pairwise AF=a and gANI=b belong to the same species and has been computed using empirical probabilities from domain wide data

$$P_r^{\text{intra-species}}[AF=a,ANI=b]=P_r^{\text{intra-species}}[AF=a]*P_r^{\text{intra-species}}[ANI=b|AF=a]$$

AF=a,ANI=b	$P_r^{\text{intra-species}}[AF=a,ANI=b]$
