Data Source: Disease Control and Prevention, National Center for Health Statistics (CDC/NCHS), National Health Interview Survey, 2013.

For the analyses on individual cardiovascular disease (CVD) type, women with other types of CVD were excluded from the comparison group.

[a]Variables in Model 1 included disease status, age group, race, immigration status, region of residence, marital status, education level, and family income to poverty threshold ratio.

[b]Variables in Model 2 further included variables from Model 1 and health insurance coverage, usual place of care, and visiting an obstetrician/gynecologist in the past year.
