

Coffee consumption and risk of endometrial cancer: a dose-response meta-analysis of prospective cohort studies

Quan Zhou¹, Meilin Luo², Hui Li³, Min Li⁴, Jian-Guo Zhou⁵

Appendix 1

Quality assessment according to the Newcastle-Ottawa scale.

Study	Country	Selection	Comparability	Outcome	Score
Jacobsen,1986	Norway	4	0	3	7
Stensvold,1994	Norway	2	0	3	6
Shimazu,2008	Japan	4	2	3	9
Friberg,2009	Sweden	3	0	3	6
Nilsson,2010	Sweden	4	1	2	7
Giri,2011	USA	4	2	2	8
Je,2011	USA	2	2	3	7
Gunter,2012	USA	2	2	3	7
Uccella,2013	USA	4	2	2	8
Gavrilyuk,2014	Norway	4	1	3	8
Weiderpass,2014	Sweden	4	2	3	9
Merritt,2015	Europe	4	2	3	9
Owenyang,2015	United Kingdom	4	2	2	8

Appendix 2

Power calculations: The methodology use is described by Hedges 2001¹ and this macro was obtained from the supplementary material in Cafri 2009². The SAS code for power calculations is below:

Power calculation for meta-analysis of total coffee intake and risk of endometrial cancer(highest versus lowest category)

```
data coffee1;
input es v;
cards;
-0.653926467 1.205550833
-0.223143551 0.192672522
-0.967584026 0.196635863
-0.287682072 0.017211028
-0.127833372 0.127112971
