S3 Table: Risk of bias assessment in all included trials

Allocation sequence																											
Allocation concealment																											
Blinding of patients and personnel																											
Blinding of outcome assessment: PFS and ORR																											
Blinding of outcome assessment for Toxicity																											
Incomplete outcome data addressed for PFS and OS																Γ											
Incomplete outcome data addressed for ORR		T							Γ							T	Π	T		T	T	Γ		T			
Incomplete outcome data addressed for toxicities																											
Free of selective reporting																										Ŀ	
Free of other bias																											
Abbreviation: PFS, progression free sur	0% rviva		S, ov	vera	ll sur	vival	l; Ol	RR, o	over	all r	espo	nse r	ate			50%	6									10	0%

Yes (low risk of bias)

Unclear (Medium risk of bias)

No (high risk of bias)
