

SUPPORTING INFORMATION

The following Supporting Information is available in the online version of this article.

File 1: Figure S1. Maximum Likelihood ITS tree of the genus *Tragopogon* showing hybrid samples forming a clade with *T. porrifolius*. Samples from the present study have a four-digit ID number in their label.

File 2: Figure S2. Maximum Likelihood ETS tree of the genus *Tragopogon* showing hybrid samples forming a clade with *T. pratensis*, and unexpected placement of the accession labelled *T. porrifolius* from the Paris herbarium. Samples from the present study have a four-digit ID number in their label.

File 3: Table S1. List of herbarium specimens deposited at the British Museum Herbarium with accession numbers.
