

Appendix 9 (as supplied by the authors): Proportion of sitagliptin and alternative hypoglycemic agent monotherapy and combination therapy users with acute pancreatitis at 90 days

Outcome	Weighted % of sitagliptin monotherapy users (unweighted %)	Weighted % of alternative hypoglycemic agent monotherapy users (unweighted %)	Weighted % of sitagliptin combination therapy users* (unweighted %)	Weighted % of alternative hypoglycemic agent combination therapy users* (unweighted %)
Hospital encounter with acute pancreatitis	0.06% (0.06%)	0.09% (0.10%)	0.09% (0.09%)	0.09% (0.10%)

*Combination therapy users were those who had at least one additional prescription for a hypoglycemic agent (ie a prescription apart from the study drug) which overlapped with the index date.
