

Supplementary Information

Manuscript title: Distribution of Cenozoic plant relicts in China explained by drought in dry season

Author list: Yongjiang Huang, Frédéric M.B. Jacques, Tao Su, David K. Ferguson, Hui Tang, Wenyun Chen & Zhekun Zhou^{*}

Supplementary Table S1. The Cenozoic relict genera considered in this study.

Genus	Family	Phenology	Time of seed germination [*]
<i>Amentotaxus</i>	Taxaceae	Evergreen	April
<i>Amesiadendron</i>	Sapindaceae	Evergreen	March to April
<i>Apterosperma</i>	Theaceae	Evergreen	Unknown
<i>Archiboehermeria</i>	Urticaceae	Evergreen	Unknown
<i>Bretschneidera</i>	Akeniaceae	Deciduous	Spring
<i>Camptotheca</i>	Nyssaceae	Deciduous	March to April
<i>Cathaya</i>	Pinaceae	Evergreen	April to June
<i>Cephalotaxus</i>	Taxaceae	Evergreen	April
<i>Cercidiphyllum</i>	Cercidiphyllaceae	Deciduous	Seed not dormant
<i>Choerospondias</i>	Anacardiaceae	Deciduous	January to March
<i>Corylopsis</i>	Hamamelidaceae	Deciduous	December to January
<i>Craigia</i>	Malvaceae	Deciduous	Unknown
<i>Cryptomeria</i>	Cupressaceae	Evergreen	Unknown
<i>Cunninghamia</i>	Cupressaceae	Evergreen	Unknown
<i>Cyclocarya</i>	Juglandaceae	Deciduous	Spring
<i>Davida</i>	Nyssaceae	Deciduous	March to April
<i>Decaisnea</i>	Lardizabalaceae	Deciduous	Unknown
<i>Dipelta</i>	Caprifoliaceae	Deciduous	Unknown
<i>Diplopanax</i>	Nyssaceae	Evergreen	Unknown
<i>Dipteronia</i>	Aceraceae	Deciduous	April
<i>Disanthus</i>	Hamamelidaceae	Deciduous	Unknown
<i>Eucommia</i>	Eucommiaceae	Deciduous	Winter and spring
<i>Euptelea</i>	Eupteleaceae	Deciduous	April to May
<i>Eurycorymbus</i>	Sapindaceae	Deciduous	Seed not dormant
<i>Euryodendron</i>	Pentaphylacaceae	Evergreen	Unknown
<i>Euscaphis</i>	Staphyleaceae	Deciduous	March to April
<i>Fortunearia</i>	Hamamelidaceae	Deciduous	April
<i>Glyptostrobus</i>	Cupressaceae	Semi-evergreen	Unknown
<i>Hemiptelea</i>	Ulmaceae	Deciduous	May
<i>Heptacodium</i>	Caprifoliaceae	Deciduous	Unknown
<i>Hovenia</i>	Rhamnaceae	Deciduous	March to April
<i>Idesia</i>	Flacourtiaceae	Deciduous	Unknown
<i>Keteleeria</i>	Pinaceae	Evergreen	Seed not dormant
<i>Koelreuteria</i>	Sapindaceae	Deciduous	Unknown
<i>Kolkwitzia</i>	Caprifoliaceae	Deciduous	Unknown
<i>Malania</i>	Ximeniaceae	Evergreen	Unknown
<i>Meliiodendron</i>	Styracaceae	Deciduous	Unknown
<i>Metasequoia</i>	Taxodiaceae	Deciduous	Seed not dormant
<i>Monimopetalum</i>	Celastraceae	Deciduous	Spring
<i>Ostryopsis</i>	Betulaceae	Deciduous	Unknown
<i>Parapyrenaria</i>	Theaceae	Evergreen	Unknown
<i>Paulownia</i>	Paulowniaceae	Deciduous	March to April

<i>Phellodendron</i>	Rutaceae	Deciduous	Unknown
<i>Platycarya</i>	Juglandaceae	Deciduous	April to May
<i>Poliothyrsis</i>	Salicaceae	Deciduous	Unknown
<i>Poncirus</i>	Rutaceae	Semi-evergreen	April to May
<i>Pseudolarix</i>	Pinaceae	Deciduous	March to April
<i>Pseudotaxus</i>	Taxaceae	Evergreen	Unknown
<i>Pteroceltis</i>	Ulmaceae	Deciduous	Spring
<i>Pterostyrax</i>	Styracaceae	Deciduous	Unknown
<i>Schizophragma</i>	Hydrangeaceae	Deciduous	Unknown
<i>Semiliquidambar</i>	Altingiaceae	Deciduous or evergreen	Unknown
<i>Sinofranchetia</i>	Lardizabalaceae	Deciduous	Unknown
<i>Sinojackia</i>	Styracaceae	Deciduous	Spring
<i>Sinopanax</i>	Araliaceae	Evergreen	Unknown
<i>Sinowilsonia</i>	Hamamelidaceae	Deciduous	Unknown
<i>Taiwania</i>	Cupressaceae	Evergreen	Unknown
<i>Tapiscia</i>	Tapisciaceae	Deciduous	March to April
<i>Tetracentron</i>	Tetracentron	Evergreen	May
<i>Tetrapanax</i>	Araliaceae	Evergreen	March to August
<i>Tetrathyrium</i>	Hamamelidaceae	Evergreen	Unknown
<i>Thujopsis</i>	Cupressaceae	Evergreen	March to May
<i>Toricella</i>	Toricelliaceae	Deciduous	Unknown
<i>Tripterygium</i>	Celastraceae	Deciduous	Unknown
<i>Weigela</i>	Caprifoliaceae	Deciduous	Unknown

* Information of seed germination is based on “Seeds of Woody Plants in China”¹.
