

# Acronyms and definitions

- **P+**: Gold standard dataset interacting
- **P-**: Gold standard dataset of non-interacting
- **NP+**: Subset of P+ composed of encoded by neighbouring genes
- **OP+**: Subset of P+ composed of encoded by non-neighbouring genes
- **T**: The dataset compiled in Burger and van Nimwegen, Mol Sys Biol 2008
- **T+**: Interacting included in T dataset
- **T-**: Non-interacting included T dataset
- **SP+**: Subset of P+ dataset composed of present in Burger and van Nimwegen's database (also used to compare to STRING database)
- **SP-**: Subset of P+ dataset composed of present in Burger and van Nimwegen's database (also used to compare to STRING database)
- **Eco** = *Escherichia coli* K-12 MG1655
- **Sll** = *Synechocystis sp.* PCC6803
- **Mll** = *Mesorhizobium loti* MAFF303099
- **Mxan** = *Myxococcus xanthus* DK 1622
