**Figure S2 : PDGF-AB enhances BM-MSCs Migration but not proliferation. (A):** BrdU incorporation in BM-MSCs 22 hours after culture in serum-free control medium or PDGF-AB supplemented medium. BM-MSCs without addition of BrdU were used as negative controls (NC). **(B):** BM-MSCs were seeded in collagen I coated-transwells. After 22h incubation, migrated cells on the lower face of the filters were counted. Data are expressed as mean  $\pm$  SEM of total number of migrated cells per inserts, from three independent experiments (one donor per experiment), each performed in triplicate. \*\*\* $P < 0.001$ . Abbreviations: PDGF-AB, platelet derived growth factor AB, BrdU, bromodeoxyuridine.
