

**Death associated protein 3 regulates mitochondrial-encoded protein synthesis
and mitochondrial dynamics**

**Lin Xiao, Hongxu Xian, Kit Yee Lee, Bin Xiao, Hongyan Wang,
Fengwei Yu, Han-Ming Shen, Yih-Cherng Liou**

SUPPLEMENTAL INFORMATION

Supplemental movie legends:

Movie S1. Association of GFP-Drp1 foci on mitochondria in control siRNA transfected cells. HeLa cells stably expressing mito-Red were transfected with control-siRNA followed by overexpression of GFP-Drp1. Time-lapse images of mitochondria and GFP-Drp1 were acquired with an interval of 4 seconds for 60 time points. Scale bar: 1 μm .

Movie S2. Association of GFP-Drp1 foci on mitochondria in DAP3 siRNA transfected cells. HeLa cells stably expressing mito-Red were transfected with DAP3-siRNA followed by overexpression of GFP-Drp1. Time-lapse images of mitochondria and GFP-Drp1 were acquired with an interval of 4 seconds for 60 time points. Scale bar: 1 μm .
