

Continuous growth measurement of a second *Rhizopus* sp clinical isolate (A), two *Mucor* sp. clinical isolates (B,C), two *L. corymbifera* clinical isolates (D,E) in presence of 0 (positive growth control) and 320 ng/ml for DEXA under standard atmosphere in RPMI, YNB and YAG. No promotion of growth was observed (p value >0.05 , t Student non parametric test).
