

Supplementary table 1. Treatment in AWaC, primary health care and labour market programs, by referral to treatment for all participants and sub-sample on long-term benefits

Treatment	All participants				Sub-sample on Long term benefits			
	Control		AWaC		Control		AWaC	
	Mean	Std.dev.	Mean	Std.dev.	Mean	Std.dev.	Mean	Std.dev.
<i>AWaC:</i>								
Hours CBT			9.50	5.84			9.15	5.74
Received Job Support			0.32				0.47	
Hours Job Support a)			5.22	5.85			6.20	6.88
<i>Health care services: b)</i>								
Physician	4.03	0.18	3.24	0.28	2.86	0.41	2.10	0.23
Psychologist	6.68	0.35	2.00	0.83	5.37	1.09	1.88	0.79
Physiotherapist	3.80	0.64	4.97	0.96	5.97	1.60	5.87	1.96
Chiropractor	0.59	0.13	0.41	0.11	0.40	0.22	0.54	0.21
<i>Received LMP c)</i>	0.20		0.11		0.35		0.20	

a) Conditional on receiving job support.

b) Number of consultations, weighted by inverse probability weights obtained from logistic regression of response to follow-up, controlling for age, gender and scores above 8 on HAD scale for anxiety and depression.

c) Labour market programmes provided by NAV.

Supplementary table 2. Per person cost- and benefit components in the cost benefit analyses, all participants and sub sample on long-term benefits

	All		On long-term benefits	
	Control	AWaC	Control	AWaC
Treatment costs:				
AWaC		28043		28043
LMP	10780	7182	22519	18728
Health services	6020	2287	6020	2287
Sum:	16800	37512	28539	49058
Benefit components: ^{a)}				
Social value of production	399 664	399 664	295 005	295 005
Social value of leisure	76 496	76 496	48 269	48 269
Reduction in public transfers	350 240	350 240	246 850	246 850
Treatment effects:				
Fully work		0.044		0.077
Partly work		0.024		0.072
Benefit per person	21173	21173	32317	32317
Net present benefit per person	-3 681	-3681	7694	7694

a) Benefit components are based on annual earnings. Social value of production is before tax earnings plus social costs (covered by the employer).
