

SUPPLEMENTAL MATERIAL

Supplemental Table 1. Clinical variables obtained

Patient characteristics

- Gender
- Diagnosis
- Weight at operation
- Age at operation
- History of prior surgical palliation
- Birthweight
- Prematurity
- Major non-cardiac congenital abnormality
- Major comorbidity
- Identified genetic syndrome

Operative characteristics

- Operation performed
- STAT category
- Bypass time

Residual defects (on post-operative transthoracic echocardiogram)

- Residual ventricular septal defect (VSD)
presence and type
- Residual VSD size
