

S2 Fig. a Digestion time series of a pooled plasma proteome sample. The digestion of a single plasma sample was followed over 24 hours. HI3 peptide summed intensities were normalized to the highest value measured in the time series for each protein

S2 Fig. b Digestion time series of a pooled plasma proteome sample. The digestion of a single plasma sample was followed over 24 hours. HI3 peptide summed intensities were normalized to the highest value measured in the time series for each protein

S2 Fig. c Digestion time series of a pooled plasma proteome sample. The digestion of a single plasma sample was followed over 24 hours. HI3 peptide summed intensities were normalized to the highest value measured in the time series for each protein
