

Supplementary Fig. S13

Supplementary Fig. S13. (A) Representative blots and (B-D) summarized data showing the phosphorylation of MAPK family members (ERK1/2, p38, JNK) in HUVECs treated with NG(5 mmol/L), Ang (1-7) (1 μmol/L), HG (30 mmol/L), HG+Ang (1-7) for 48 hours. Data are means ± SEM from 4 individual experiments, **p*<0.05.
