

Supplementary Fig. S7

Supplementary Fig. S7. (A) The activity of ACE2 in human umbilical vein endothelial cells (HUVECs) following 24-hour exposure to diminazene aceturate (DIZE) at different concentration. **(B)** Plasma ACE2 activity in *db/db* mice treated with vehicle or DIZE (15mg/kg/day) for 2 weeks. Data are means \pm SEM from 6 individual samples. * $p < 0.05$.
