Supplementary information

Supplementary Fig. S1. Effect of LMP7 deficiency on Foxp3 expression

Expression of *Foxp3* in epididymal WAT of WT and LMP7^{-/-} mice on normal chow and HFD (n = 4 for each).

Supplementary Fig. S2. Effect of LMP7 deficiency on the production of IL-1 β , IL-6, and TNF- α

Peritoneal macrophages were isolated from WT and LMP7^{-/-} mice (n = 4 for each), and treated with or without palmitate for 24 h. The levels of IL-1 β , IL-6, and TNF- α in the supernatants were assessed. Data are expressed as mean \pm SEM. * p < 0.05, ** p < 0.01.

Supplementary figure S3. Effect of LMP7 deficiency on the expression of *Adipoq*, *Pparg*, *Cebpa*, and *Cebpb*

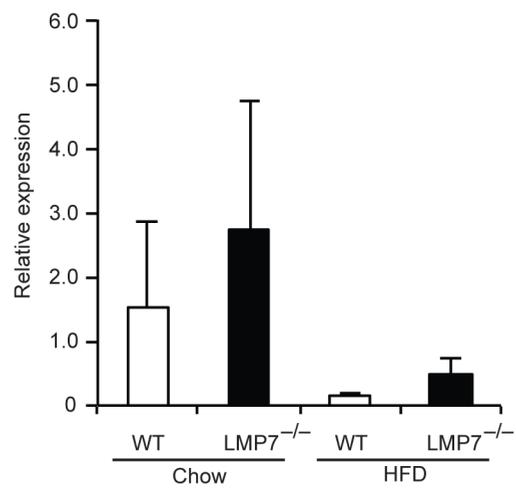

Epididymal WAT was extracted from WT and LMP7^{-/-} mice fed with HFD for 8 weeks. *Adipoq*, *Pparg*, *Cebpa*, and *Cebpb* mRNA expression was assessed by real-time RT-PCR analysis (normal chow: n = 4, HFD: n = 8 for each). Data are expressed as mean \pm SEM. * p < 0.05, ** p < 0.01.

Supplementary Table S1: Primer List for real-time PCR
