

## Supplementary Data

**Supplementary Table 1. Additional Sample Characteristics and Mean Weighted Screen Time for Characteristics**

	Percent of sample with characteristic (n) (n = 302)	Mean (SD) weighted screen time, hours	Mann-Whitney's or Kruskal-Wallis' p value for group
AAP recommendations	—	—	—
Screen time	—	—	—
Meets recommendation for age	53% (151)	0.8 (0.7)	<b>&lt;0.001</b>
Does not meet recommendation for age	47% (135)	2.6 (1.7)	
TV in bedroom	—	—	—
No TV in bedroom	56% (163)	1.5 (1.3)	0.27
Yes TV in bedroom	44% (126)	1.8 (1.8)	
Meets both recommendations	—	—	—
Yes	29% (79)	0.8 (0.7)	<b>&lt;0.001</b>
No	71% (195)	2.0 (1.7)	
Parent attitudes	—	—	—
TV is of value	—	—	—
Disagree	34% (95)	1.2 (1.4)	<b>&lt;0.001</b>
Do not disagree	66% (182)	1.9 (1.6)	
TV is useful	—	—	—
Disagree	42% (119)	1.5 (1.5)	0.09
Do not disagree	58% (164)	1.7 (1.5)	
I restrict TV	—	—	—
Agree	70% (192)	1.5 (1.4)	0.10
Do not agree	30% (84)	1.9 (1.9)	
I have to be sure my child does not watch too much	—	—	—
Agree	72% (207)	1.5 (1.4)	0.27
Do not agree	28% (79)	1.8 (1.8)	
I will switch off TV if too much	—	—	—
Agree	81% (231)	1.6 (1.4)	0.99
Do not agree	19% (56)	1.78 (2.0)
