

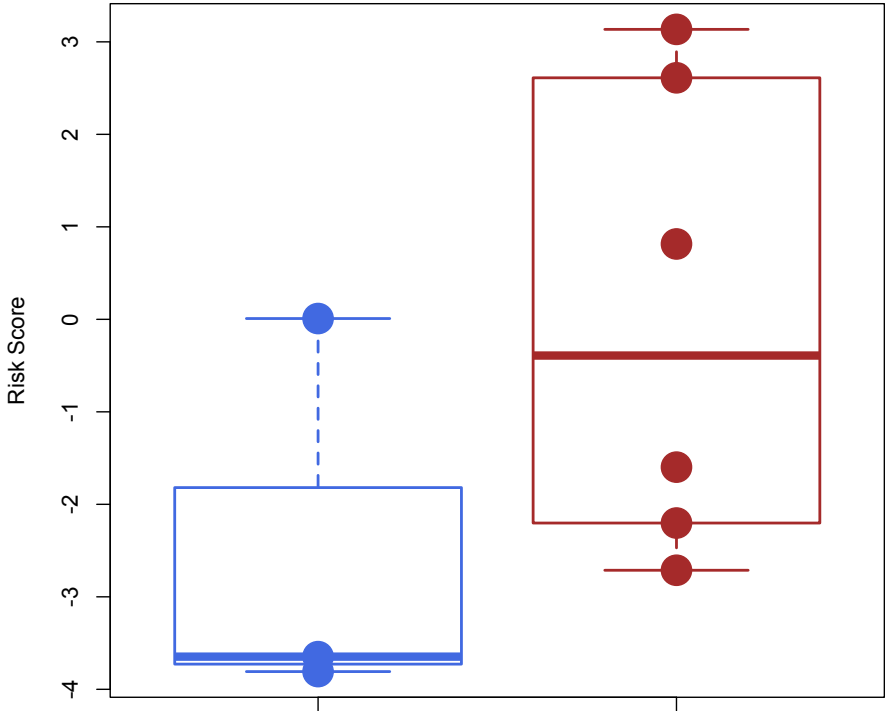

Figure S2

SNP p-value cutoff = 10^{-3}

SNP p-value cutoff = 10^{-4}

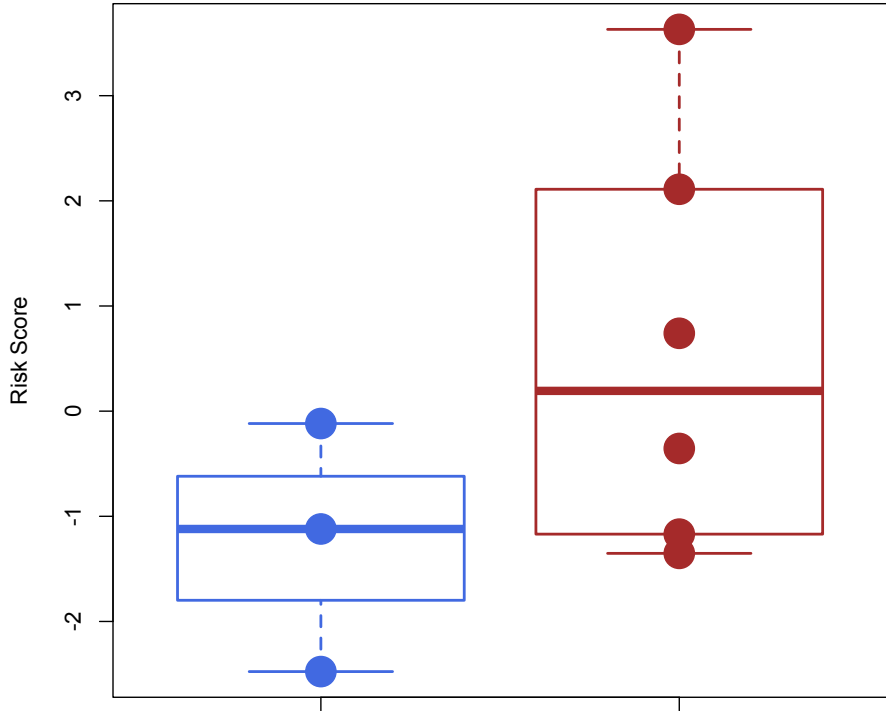

Figure S2. Distribution boxplots of subjects' polygenic risk scores for the schizophrenia (brown outline) and non-psychotic (blue outline) groups, using the SNPs at association p-value cutoff of 0.001 (10^{-3}) and 0.0001 (10^{-4}). Please see Methods for details.
