

S2 Fig. A. Representative appearance pictures of LOF^{Notch1} and LOF^{Ctrl}. Skin tissue histology appears normal as examined by H&E at week 6. **B.** Hes1 expression is undetectable in fibroblasts located at capsule of melanoma in LOF^{Notch1} mice but slightly detectable at capsule of melanoma LOF^{Ctrl} mice. Arrowheads point to nuclear-localized Hes1 in fibroblasts. Antibody recognizes Hes1 was purchased from Abcam (ab71559).
