

Supplementary Table S1 Adjusted hazard ratios (aHR) for having a major uterine procedure associated with fibroid size at enrollment (diameter of largest fibroid) after excluding women with submucosal fibroids, National Institute of Environmental Health Sciences Uterine Fibroid Study 8-year follow-up ($N = 777$).

Fibroid size	N	aHR ^a	95% CI ^b
No fibroids	323	1.0	–
<2 cm	127	2.9	0.9–9.0
2–3.99 cm	223	10.4	4.3–25.1
≥4 cm	104	31.6	13.0–76.9

^aModels adjusted for age and ethnicity.

^bCI, confidence interval.
