

## Appendix B: Intervention Results Tables & Figures

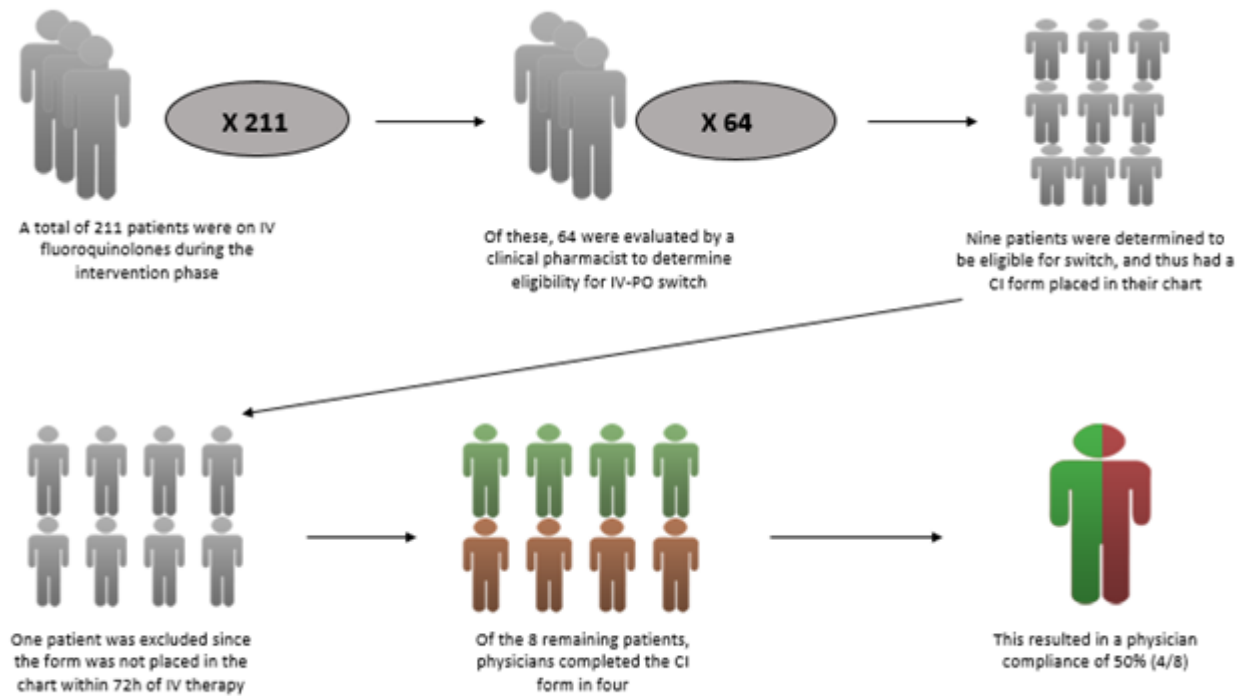

Figure 1. Outlining the intervention timeline for all patients on IV fluoroquinolones from February 11th - March 17th, 2013.

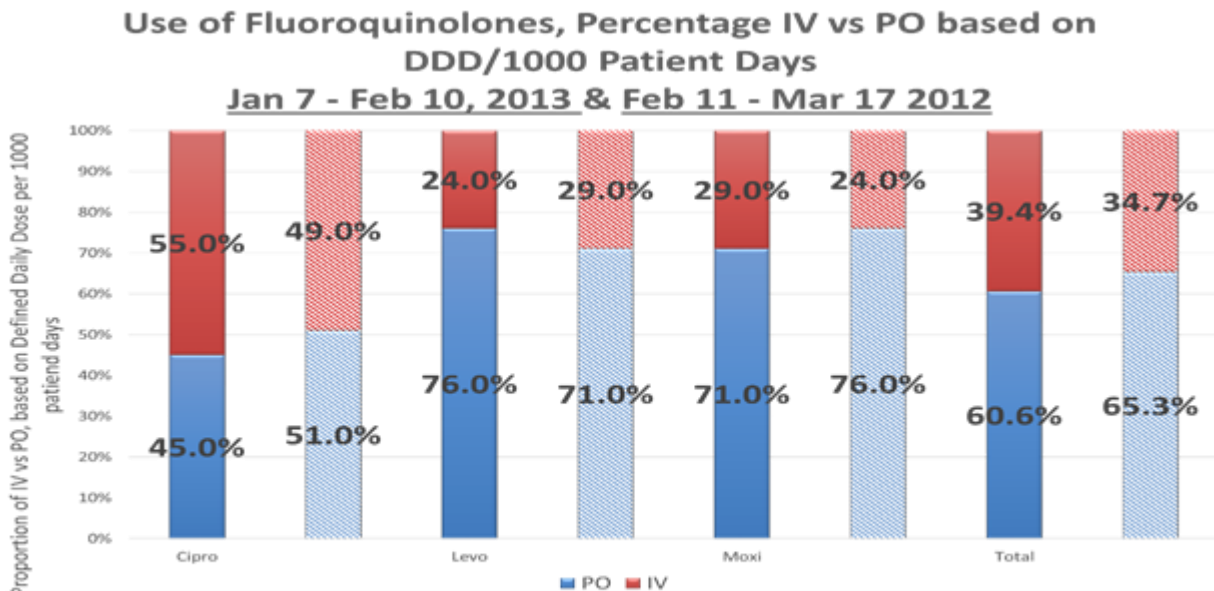

Figure 1. The hospital-wide ratio of IV:PO usage for each individual fluoroquinolone as well as the entire class. Shown as DDD/1000 patient days, as a ratio of total therapy. The bar on the left is the pre-intervention data while the bar on the right is the data from the intervention phase.

*Table 2. Comparison of patient outcome data between the individuals who had the attending physician complete the Clinical Intervention form to those who did not.*

	<b>Physician Compliance</b>	<b>Non Physician Compliance</b>
<b>No. of patients</b>	4	4
<b>Average days IV</b>	3	4.25
<b>Average days PO</b>	3	2.75
<b>Ratio IV:PO</b>	1:1	1.55:1
<b>4+ days on IV abx</b>	1	3
