

S3 Fig. Genetic ablation of *Enpp2* has no effect in tissue histology. Representative images of tissue sections (H&E staining) from R26Cre-ER^{T2}/Enpp2^{n/n} mice and littermates treated IP with Tmx (100 mg/kg) or corn oil for **A**. 10 days and **B**. 5 days. Mice were sacrificed 20 or 10 and 20 days post Tmx treatment, respectively. (Scale bar: 150 μ m).
