

S4 Fig. Genetic deletion of *Enpp2* has no effect in tissue histology. Representative images of tissue sections (H&E staining) from R26Cre-ER^{T2}/Enpp2^{n/n} mice and littermates treated PO with Tmx (180 mg/kg) or corn oil for 6 days. Mice were sacrificed 18 and 30 days post Tmx administration. (Scale bar: 150 μ m).
