

## Supplementary Material

**Landmarks (x and y coordinates)**

1. posterior midpoint of the caudal peduncle
  2. anterior insertion of the anal fin at the first soft ray
  3. posteroventral corner of the ectocoracoid bone
  4. posterodorsal corner of the ectocoracoid bone
  5. anterior-most corner of the ectocoracoid bone
  6. anteroventral corner of the opercle
  7. posterodorsal corner of the opercle
  8. dorsal edge of the opercle-hyomandibular boundary
  9. dorsal-most extent of the preopercle
  10. posteroventral corner of the preopercle
  11. anterior-most extent of the preopercle along the ventral silhouette
  12. posteroventral extent of the maxilla
  13. anterodorsal extent of the maxilla
  14. No landmark
  15. anterior margin of the orbit in line with the eye's midpoint
  16. posterior margin of the orbit in line with the eye's midpoint
  17. ventral margin of the orbit in line with the eye's midpoint
  18. posterior extent of neurocranium (i.e., supraoccipital) along dorsal silhouette
  19. anterior insertion of the dorsal fin at the first soft ray
  20. posterior insertion of the anal fin at the first soft ray
  21. edge of the lachrymal at the naris
  22. dorsal margin of the orbit in line with the eye's midpoint
  23. anterior-most extent of the premaxilla
  24. dorsal insertion of the pectoral fin
  25. ventral insertion of the pectoral fin
  26. dorsum of the trunk over the pectoral fin midpoint
  27. posterior insertion of the dorsal fin at the first soft ray
- centroid size (square root of the sum of squared distances of the 26 landmarks from their centroid )

### Meristics

- lateral plate count
- 1<sup>st</sup> dorsal spine presence/absence
- 2<sup>nd</sup> dorsal spine presence/absence
- long gill raker count (on the first gill arch)
- short gill raker count (on the first gill arch)

### Figure S1 All phenotypes scored

Landmark numbers were made consistent with those in Arnegard et al. (2014).
