

Supplementary information, Figure S6 Notch signaling functions downstream of Gpr183. (A-C) The expression of *ephrinB2a*, *hey2* and *cmyb* at 36 hpf in embryos treated with clotrimazole and/or DBZ. (D) *her6* and *her9* expression at 36 hpf in embryos treated with clotrimazole and/or DBZ by qPCR. Error bar, \pm s. d. * $p < 0.05$, ** $p < 0.01$.
