

Improving Patient Follow Up data

	Pre (n=20)	Post (n=20)
Mean length of stay	6.65	8.84
Mean no. of Interventions	1.5	2.2
Patients with No follow up	15.0%	5.0%
Patients who RIP	0%	10%
Patient transfers	0%	10%
Total No. Interventions	32	41
No. Interventions on Discharge Summary	30	41
% Interventions on Discharge Summary	93.8%	100.0%
No. Interventions requiring secondary care follow up	22	33
No. Interventions that occurred	16	26
% Interventions that occurred	72.7%	78.8%
Total No. GP jobs	9	5
No. GP blood tests	4	4
No. GP bloods carried out	3	4
% GP bloods taken	75%	100%
Average time to follow up (days)	26	24
Average delay in follow up (days)	8	6
No. Interventions with time limits stated	19	32
No. Interventions carried out within time limit	12	12
% of Interventions within time limit	63.2%	37.5%

Series 1: Interventions on discharge summary

Series 2: Interventions that were carried out

Series 3: Interventions that were carried out within stated time limit on discharge summary
