DNA replication
DNA-dependent DNA replication
DNA-dependent DNA replication initiation
DNA replication, Okazaki fragment processing
DNA replication, removal of RNA primer
ribosome biogenesis
ribosomal large subunit biogenesis
response to fungus
response to yeast
fatty acid elongation
multi-organism process
hexose metabolic process
biosynthetic process
cellular amino acid and derivative metabolic process
oxidation reduction
primary metabolic process
cellular ketone metabolic process
organic acid metabolic process
metabolic process
lipid metabolic process
response to biotic stimulus
cellular process
response to stimulus
response to stress
oxoacid metabolic process
organic acid catabolic process
cellular metabolic process
catabolic process
carboxylic acid catabolic process
steroid metabolic process
cellular response to stimulus
organic acid biosynthetic process
carboxylic acid metabolic process
small molecule metabolic process
cellular carbohydrate metabolic process
cellular catabolic process
cellular response to stress
cellular response to chemical stimulus
carboxylic acid biosynthetic process
monocarboxylic acid metabolic process
extracellular matrix constituent secretion
alcohol metabolic process
multicellular organismal homeostasis
response to chemical stimulus
cellular amino acid metabolic process
fatty acid metabolic process
carbohydrate metabolic process
aromatic compound catabolic process
ER to Golgi vesicle-mediated transport
sterol metabolic process
L-phenylalanine metabolic process
response to estrogen stimulus
response to organic substance
cellular amine metabolic process
protein amino acid N-linked glycosylation via asparagine
aromatic amino acid family catabolic process
long-chain fatty acid metabolic process
cholesterol metabolic process
cellular response to estrogen stimulus
amine metabolic process
cartilage development
L-phenylalanine catabolic process
long-chain fatty acid biosynthetic process
