

<b>TABLE 1: Handover Assessment</b>	
<b>Audit Criteria</b>	<b>Percentage of Handovers containing the relevant information at: Baseline (n=105)</b>
A day the task was to be completed	73%
A list of current problems / differential diagnoses	47%
The patient's relevant past medical history	9%
The actual task to be completed	95%
An indication for the task to be completed	63%
The plan/action to be taken as a result of the task once completed	43%
Whether junior doctors felt the handover was subjectively clear	51%

*Table 1: Audit results of handovers on the original electronic handover system. This illustrates the percentage of handovers that contained the information relevant to the corresponding pre-entered handover subheadings.*
