<sup>a</sup>Each DOI value was transformed to the base 10 logarithm (log DOI)

<sup>b</sup>Significance was defined as FDR corrected p < 0.00096.

**Supplementary Figure S1.** This figure illustrates correlations between the mean [oxy-Hb] changes during LFT and DUP in FES patients. The scatter plot illustrates typical nonsignificant channel in ch35. (Spearman's rank correlation coefficient rho = -0.01, n.s.)

**Supplementary Figure S2.** This figure illustrates correlations between the mean [oxy-Hb] changes during CFT and DUP in FES patients. The scatter plot illustrates typical nonsignificant channel in ch3. (Spearman's rank correlation coefficient rho = -0.007, n.s.)
