Figure S1. Dendrogram of PCR/DGGE profiles for 16S rRNA gene created using the UPGMA method based using Bionumerics Software. T0-control (control, time zero); T10-control (control, day 10 of the experiment); T10-consortium (consortium, day 10 of the experiment); T10-oil (oil, day 10 of the experiment); T10-oil+consortium (oil and consortium, day 10 of the experiment).
