

Estimated Parameters for OS and PFS

Estimated parameter, the 95% CI, months	Patients category		
	All, n=42*	ADCC Non-responders, n=17	ADCC Responders, n=8
OS Median 95% CI	4.06 (3.06-5.58)	3.27 (2.66-10.2)	4.63 (3.88-NA&)
PFS Median 95% CI	1.77 (1.68-3.45)	1.71 (1.61-3.45)	3.61 (3.45-NA&)

*Two patients did not have complete records for OS and PFS estimation. &The upper bound has not been reached.

Supplemental Table 1. Statistical parameter estimates for OS and PFS for patients that had ADCC performed and for those ADCC was not performed.
