Supplementary Panel 2. Open and Calm participants' changes in cortisol secretion dynamics

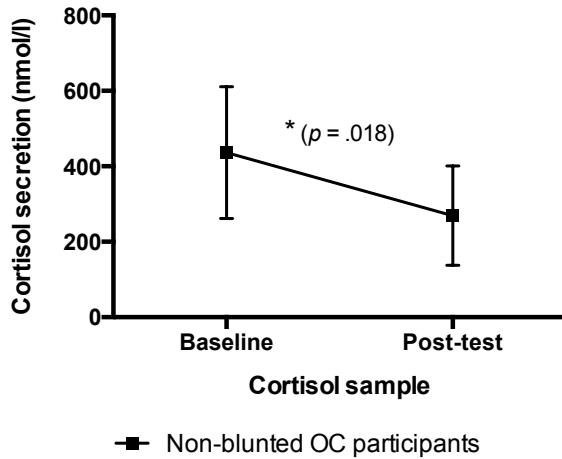

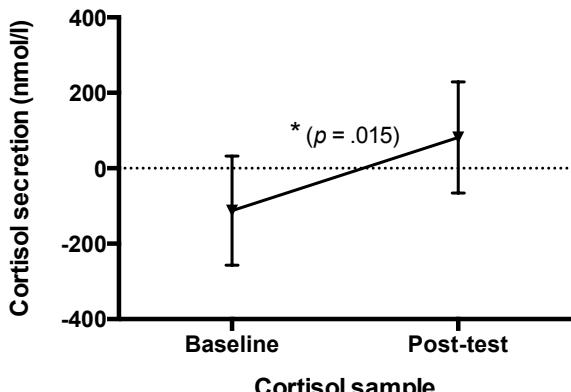

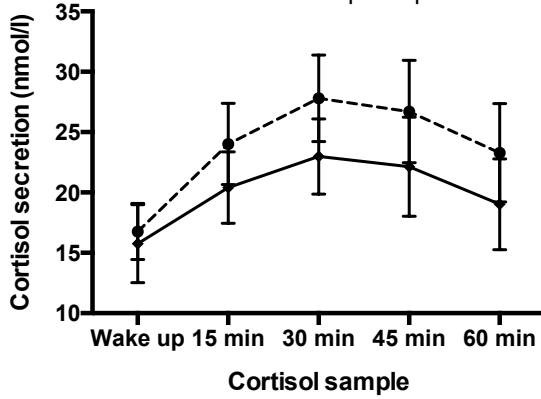

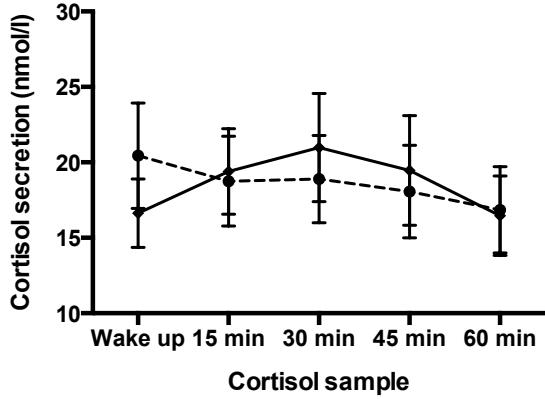

Notes. *.*p*<.05 (two-tailed, intent-to-treat analyses). *(a)*. Pre-post changes in the Cortisol Awakening Response (CAR) Area Under Curve - Increase (AUC_I) for non-blunted OC participants (*n*=15). *(b)*. Pre-post changes in AUC_I for blunted OC participants (*n*=18). *(c)*. Descriptive plot of baseline and post-test values for saliva samples 1-5 for non-blunted OC participants. *(d)*. Descriptive plot of baseline and post-test values for saliva samples 1-5 for blunted OC participants. Error bars represent 95% CI of the mean. Supplementary Table 2 shows descriptive cortisol data and test statistics.
