

Table e-2. Median (min, max) scores for verbal memory and naming tests per patient subgroup (iMTT, dMTT), and per subtest, using a permutation test. ^a $p < .0001$ dMTT vs. Controls comparison. ^b $p < .01$ iMTT vs. Controls comparison. ^c $p < .05$ iMTT vs. Controls comparison. ^d $p < .01$ dMTT vs. iMTT comparison. ^e $p < .05$ dMTT vs. iMTT comparison.
